add	adicionar	/æd/	run	rodar / operar	/rʌn/
sow	semear	/soʊ/	cultivate	cultivar	/'kʌltiveɪt/
harvest	colher	/'hɑ:rvɪst/	lime	aplicar calcário	/laɪm/
trim	aparar	/trɪm/	remove	remover	/rɪ'mu:v/
repeat	repetir	/rɪ'pi:t/	label	rotular	/'leɪbəl/
treat	tratar	/tri:t/	sterilize	esterilizar	/'sterəlaɪz/

Every day, farmers need to apply different techniques in the field. They add fertilizers to the soil and fix machines when something is not working well. During the planting season, they sow seeds and later cultivate the crops with care. When the plants grow too much, they trim branches and remove damaged parts. Before harvesting, farmers often treat the plants to protect them from diseases. In some cases, they lime the soil to improve fertility. After that, they label containers and repeat the process in other fields. These actions are part of daily farm management and help improve productivity and crop quality.

soybean	soja	/ˈsɔɪbɔɪn/	corn	milho	/kɔːrn/
wheat	trigo	/wi:t/	cotton	algodão	/ˈkɑːtən/
lettuce	alface	/ˈletɪs/	spinach	espinafre	/ˈspɪnɪtʃ/
tomato	tomate	/təˈmeɪtəʊ/	cucumber	pepino	/ˈkjuːkʌmbər/
carrot	cenoura	/ˈkærət/	onion	cebola	/ˈʌŋjən/
garlic	alho	/ˈgɑːrlɪk/	pumpkin	abóbora	/ˈpʌmpkɪn/
cassava	mandioca	/kəˈsɑːvə/	okra	quiabo	/ˈoʊkrə/

On a farm, many different crops grow together. Soybean, corn, and wheat are very common in large fields. Farmers also plant vegetables like lettuce, spinach, tomato, and cucumber. In smaller areas, they grow carrot, onion, garlic, and okra. Some farms produce pumpkin and cassava for local markets. Each plant needs the right soil, water, and care. During the season, farmers check the plants every day to see if they are healthy. These crops are important for food production and for the local economy. Good crop management helps farmers have better results and stronger plants.

beef cattle	gado de corte	/bi:f 'kætəl/	dairy cows	vacas leiteiras	/'deri kaʊz/
pigs	porcos	/pɪgz/	sheep	ovelha	/ʃi:p/
lamb	carneiro	/læm/	goat	cabra	/gəʊt/
broiler chicken	frango de corte	/'brɔɪlər/	rooster	galo	/'ru:stər/
insects	insetos	/'ɪnsektz/	caterpillar	lagarta	/'kætərpɪlər/

Many farms work with animals and livestock. Beef cattle and dairy cows are common and need daily care. Farmers feed the animals and check their health. Some farms raise pigs, sheep, and lambs for meat production. Others have goats and broiler chickens. A rooster is usually part of the chicken group. Farms also deal with insects and sometimes caterpillars, which can be a problem for animals and crops. Good livestock management is important to keep animals healthy and productive. Clean areas, food, and water are essential for farm success.

English	Português	Pronúncia	English	Português	Pronúncia
tractor	trator	/ˈtræktər/	combine	colhedora	/ˈkɑːmbaɪn/
machine	máquina	/məˈʃiːn/	field	lavoura	/fiːld/
greenhouse	casa de vegetação	/ˈɡriːnhaʊs/	nursery pots	vasos	/ˈnɜːrsəri pɑːts/
trays	bandejas	/treɪz/	containers	recipientes	/kənˈteɪnərz/
fence line	cerca	/fens laɪn/	orchard	pomar	/ˈɔːrtʃərd/

Modern farms use different machines and structures. A tractor helps farmers work faster in the field. A combine is important during harvest time. Other machines support daily activities. Some farms use a greenhouse to grow plants in a protected environment. Farmers also use nursery pots, trays, and containers to prepare seedlings. An orchard is a place where fruit trees grow. Many farms have a fence line to protect the area. Good equipment and structure make farm work easier and more efficient.

English	Português	Pronúncia	English	Português	Pronúncia
soil	solo	/sɔɪl/	soil fertility	fertilidade do solo	/fər'tɪləti/
organic matter	matéria orgânica	/ɔ:r'gæɪɪk/	nutrients	nutrientes	/'nu:triənts/
potassium	potássio	/pə'tæsiəm/	nitrogen	nitrogênio	/'naɪtrədʒən/
pH level	nível de pH	/pi: eɪtʃ/	soil moisture	umidade do solo	/'mɔɪstʃər/
infiltration	infiltração	/,ɪnfɪl'treɪʃən/	aeration	aeração	/,er'eɪʃən/

Healthy soil is essential for good farming. Farmers focus on soil fertility and add organic matter to improve quality. Plants need nutrients like potassium and nitrogen to grow well. Farmers check the pH level and the soil moisture regularly. Good infiltration helps water reach the roots. Sometimes, farmers use aeration to improve soil structure. With good soil management, crops grow stronger and produce better results. Soil care is a key part of sustainable agriculture.

English	Português	Pronúncia	English	Português	Pronúncia
weed	erva daninha	/wi:d/	weed problems	problemas com daninhas	/wi:d/
pest	praga	/pest/	pest management	manejo de pragas	/ˈmæɪdʒmənt/
disease	doença	/diˈzi:z/	foliar disease	doença foliar	/ˈfoʊliər/
insecticide	inseticida	/ɪnˈsektɪsaɪd/	herbicide	herbicida	/ˈhɜ:rbɪsaɪd/
fungicide	fungicida	/ˈfʌndʒɪsaɪd/	nematode	nematoide	/ˈnemətəʊd/

Farms often face problems with weeds, pests, and diseases. Weed problems reduce productivity and compete with crops. Pest management is important to control insects and protect plants. Farmers identify each pest and disease, including foliar disease, before acting. They use insecticide, herbicide, and fungicide when necessary. Nematodes can also damage crops. Correct application and monitoring help reduce losses. Crop protection keeps plants healthy and improves farm results.

English	Português	Pronúncia	English	Português	Pronúncia
every day	todo dia	/ˈevri deɪ/	in the morning	de manhã	/ˈmɔːrnɪŋ/
at night	à noite	/æt naɪt/	sometimes	às vezes	/ˈsʌmtaɪmz/
never	nunca	/ˈnevər/	yesterday	ontem	/ˈjestərdeɪ/
last week	semana passada	/læst wiːk/	next week	próxima semana	/nekst wiːk/
a long time ago	há muito tempo	/ə ˈlɔːŋ taɪm/	early season	ciclo precoce	/ˈɜːrli/

Farm routines change with time. Farmers work every day, often in the morning and at night. They sometimes work long hours and never stop checking the fields. Yesterday, they may inspect the crops, and last week they prepare the soil. Next week, they plan planting or harvesting. Some activities happened a long time ago, like the first planting of the field. In an early season, work starts sooner. Time organization is very important in agriculture, and good planning helps farmers make better decisions.
